COSC4353 Assignment 2

Group #3

1. Provide a link to GitHub repository for TAs to view the code? (1 point)

- https://github.com/COSC4353-group-3/Assignment-2

2. Discuss if your design and development methodology has changed since assignment 1 and why? (1 point)

- Our development methodology has not changed. We are still using the Agile development methodology and having regular meetings to discuss the project and our progress. This methodology has been good for our project development, and therefore has not needed to be changed.
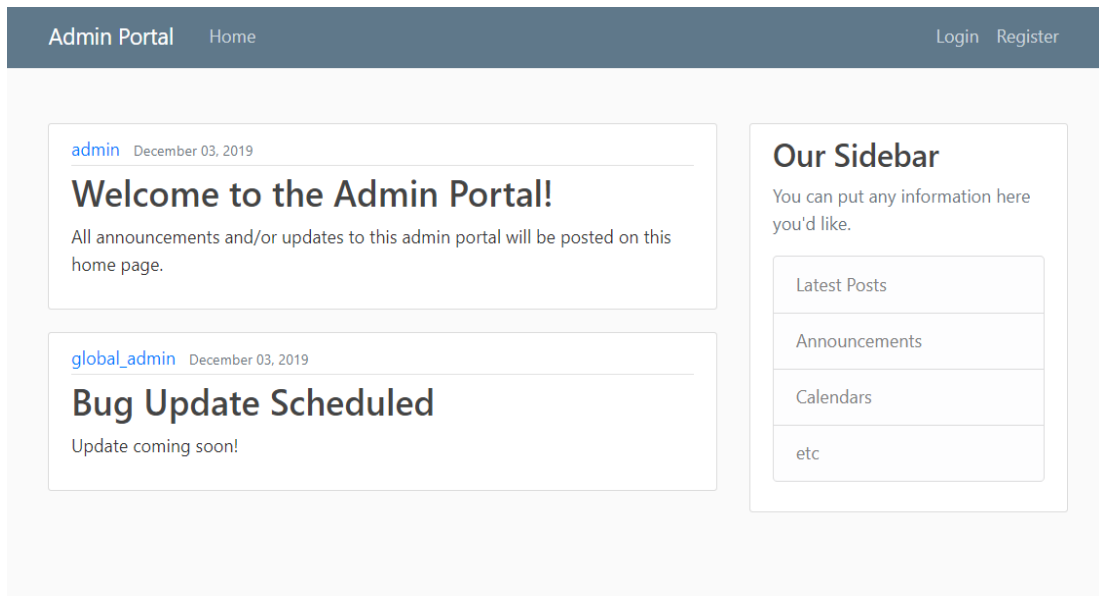

3. List what front end technologies you are using and why. List who is responsible for doing what in your group? (2 points)

- For this assignment, we are using python and Django to code the front end website. Django is a python extension that takes a lot of the redundant work in making websites, like the HTML and CSS, and automates it. This allows for easier web development and cleaner sites, so we have chosen this platform. One of our group members has also had experience working with this technology, which also contributed to our decision.
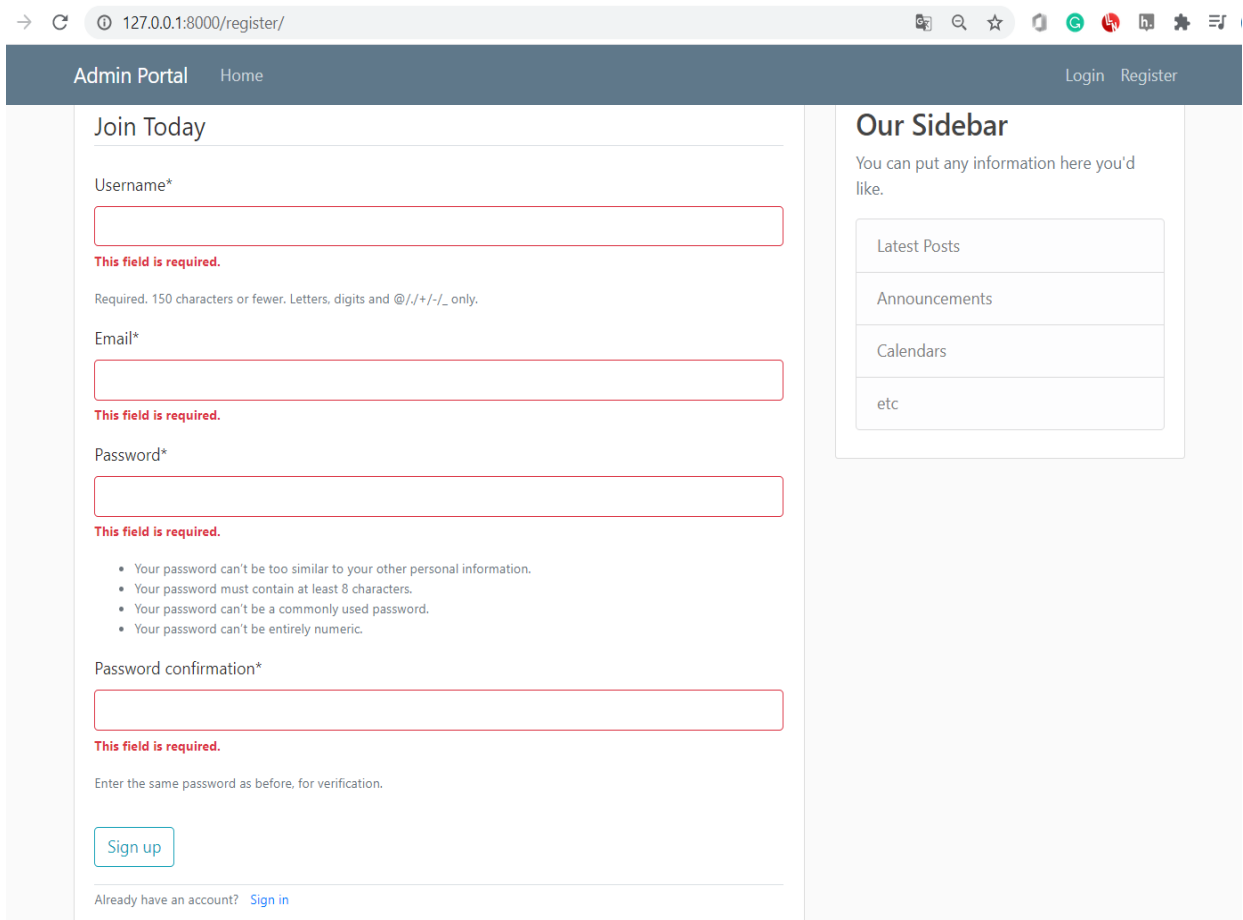

Name	Tasks
Oulu Li	Project overview, testing and reviewing website, cover the writing portion of the assignment 2
Tammy Ren	Create the Github account, testing and reviewing site, and cover the writing portion of the assignment 2
Lester Moreira	Contribute to our decision and develop the web pages in Python with Django

4. Provide screenshots of your front end, each page? (5 points)

- This is our Home page:
